

PAINT SPRAY BOOTHS

We received an interpretation from the International Code Council (ICC) stating, in part, that “the provisions for spray paint booths in the County of Los Angeles Fire Code (LACFC) should be applied rather than the provisions in the County of Los Angeles Mechanical Code (LACMC).” The provisions of Section 506.0 of the CLAMC to paint spray booths, including the restriction on the termination distance of exhaust outlets from property lines in Section 502.2.2 shall not be reviewed. Fire Department approval for these projects shall be required and considered as proof of compliance with the LACFC.

Additionally, powder coating ovens shall be reviewed by the Fire Department.

Supersedes MCM 610.0 (04/01/2003)

Carlos Clayton
Chief Mechanical Inspector
